

SURAJ KUMAR SAH

SOFTWARE QA & FULL-STACK DEVELOPER

Kathmandu, Nepal • 9806840056 • suraj27227@gmail.com

[Portfolio](#) • [GitHub](#) • [LinkedIn](#)

PROFILE

Final-year BSc IT student and full-stack developer with hands-on experience building React, Node.js, and PostgreSQL applications - including REST APIs, authentication systems, and database-backed web platforms. Comfortable working across the frontend and backend, debugging complex application issues, and shipping and deploying full-stack projects end to end. Seeking a Software QA Internship opportunity to apply my background in full-stack development, API integration, and edge-case testing to ensure high-quality software delivery.

TECHNICAL SKILLS

Frontend: React, JavaScript (ES6+), HTML5, CSS3, EJS, Responsive Design, Konva.js (Canvas)

Backend: Node.js, Express.js, RESTful APIs

Databases: PostgreSQL, MongoDB

Testing & QA: Manual Testing, Black-Box Testing, API Testing, Edge-Case Identification, SDLC/STLC

Authentication: JWT, OAuth, Passport.js, Sessions, bcrypt

Tools & APIs: Git, GitHub, Postman, Cloudinary

Deployment: Vercel, Render, Neon PostgreSQL

PROJECTS

BlushBook - Full-Stack Photobook SaaS

React · Node.js · Express · PostgreSQL · Cloudinary

- Built and deployed a full-stack web application for creating and customizing printed photobooks
- Developed a React-based photobook editor with photo uploads, templates, customization, preview, and end-to-end user workflows
- Implemented backend REST APIs, authentication, PostgreSQL data management, and image handling via Cloudinary
- Debugged and resolved frontend state, CSS, editor rendering, and API/authentication issues across the application

Live: [Live Demo](#)

PrimeTrade - Trading Platform

React · Node.js · Express · PostgreSQL

- Developed a full-stack trading platform with REST APIs, JWT authentication, role-based access control, and CRUD workflows
- Built React dashboard functionality and integrated protected backend routes with PostgreSQL

GitHub: [GitHub Repo](#)

ExploreHimalaya - Trekking Booking Platform

React · Node.js · Express · PostgreSQL

- Built an end-to-end trekking booking application with destination pages, booking workflows, and payment integration
- Worked across frontend, backend APIs, database integration, and deployment preparation

Live: [Live Demo](#) | GitHub: [GitHub Repo](#)

Ledger - Finance Dashboard

Vanilla JavaScript · HTML · CSS · Chart.js

- Developed a responsive personal finance dashboard featuring dynamic data visualization, simulated role-based access control, and dark/light theme toggling
- Engineered a centralized state management system using Vanilla JS (ES6+) and localStorage, ensuring UI and data sync without framework dependencies
- Integrated Chart.js to render real-time balance trends and expense breakdowns that automatically update on transaction CRUD operations

Live: [Live Demo](#) | GitHub: [GitHub Repo](#)

AI-Solutions (Capstone Project)

Node.js · Express · EJS · PostgreSQL

- Architected a full-stack application and custom CMS for a simulated AI startup, managing the complete lifecycle from requirements gathering to deployment
- Developed a secure, password-protected admin dashboard with bcrypt authentication, session management, and full CRUD functionality
- Designed relational PostgreSQL databases to process lead-generation forms and serve dynamic website content
- Integrated an AI-powered virtual assistant and validated system reliability through 58 documented black-box test cases

EDUCATION

BSc (Hons) Information Technology - Final Year (Expected 2026) | ISMT College, Kathmandu

Affiliated with the University of Sunderland, UK

ADDITIONAL

- Open to full-time, in-person Software QA internship, trainee, or junior opportunities
