

SURAJ KUMAR SAH

FULL-STACK DEVELOPER

Kathmandu, Nepal • 9806840056 • suraj27227@gmail.com
getblushbook.com • github.com/surajshah20 • linkedin.com/in/surajshahcs

PROFILE

Final-year BSc IT student and full-stack developer with hands-on experience building React, Node.js, and PostgreSQL applications — including REST APIs, authentication systems, and database-backed web platforms. Comfortable working across the frontend and backend, debugging complex application issues, and shipping and deploying full-stack projects end to end. Seeking internship, trainee, or junior software development opportunities.

TECHNICAL SKILLS

Frontend: React, JavaScript (ES6+), HTML5, CSS3, EJS, Responsive Design, Konva.js (Canvas)

Backend: Node.js, Express.js, RESTful APIs

Databases: PostgreSQL, MongoDB

Authentication: JWT, OAuth, Passport.js, Sessions, bcrypt

Tools & APIs: Git, GitHub, Postman, Cloudinary

Deployment: Vercel, Render, Neon PostgreSQL

PROJECTS

BlushBook — Full-Stack Photobook SaaS

React · Node.js · Express · PostgreSQL · Cloudinary

- Built and deployed a full-stack web application for creating and customizing printed photobooks
- Developed a React-based photobook editor with photo uploads, templates, customization, preview, and end-to-end user workflows
- Implemented backend REST APIs, authentication, PostgreSQL data management, and image handling via Cloudinary
- Debugged and resolved frontend state, CSS, editor rendering, and API/authentication issues across the application

Live: getblushbook.com

PrimeTrade — Trading Platform

React · Node.js · Express · PostgreSQL

- Developed a full-stack trading platform with REST APIs, JWT authentication, role-based access control, and CRUD workflows
- Built React dashboard functionality and integrated protected backend routes with PostgreSQL

ExploreHimalaya — Trekking Booking Platform

React · Node.js · Express · PostgreSQL

- Built an end-to-end trekking booking application with destination pages, booking workflows, and payment integration
- Worked across frontend, backend APIs, database integration, and deployment preparation

Secure Authentication System

Node.js · Express · PostgreSQL · bcrypt · Passport.js

- Implemented secure authentication flows including password hashing, Google OAuth, sessions, and protected routes

EDUCATION

BSc (Hons) Information Technology — Final Year (Expected 2026) | ISMT College, Kathmandu

Affiliated with the University of Sunderland, UK

ADDITIONAL

- Open to full-time, in-person internship, trainee, or junior software development opportunities
- Expected graduation: 2026
